violent video games

Do violent video games effect real life actions?

Pros

Its responsible for thing in school like bullying

- video games have been blamed for school shootings.
- about 60% of msb (middle school boys) that have played a mature rated game have probably hit or beat up someone.
- two teens in TN shot at passing cars and told the police that they got the idea from playing GTA III.

it influences hurting others

- Some games are so realistic that they enhance violent acts
- The use of realistic controllers can have a great effect on peoples level of aggression
- Many mass shootinghave been carried by video game players

video games usually make the player simulate violent actions

Cons

research doesnt prove this

- Often times after tragic school shootings the politicians blame video games.
- Violence most of the time refers to physical violence or physical acts that hurt people.

not many people who play video games become violent

- Total U.S. dollars used to buy video games went up to $13.1 billion while the act of violent crimesdropped by 37%
- Youths exposed to violent video games have shown more pro social behavior

Violent games allow youth to experiment with moral issues such as war, violence, and death without real world consequences.

video games sont effect real life violence
